Discharge (T.X)	tx	Uses the same rule as End of Contract
Voluntary	voluntary	Uses the Mandatory Retirement formula family
Old Age	oldAge	Uses the Mandatory Retirement formula family
Abolition of Office	abolition	Uses the special 25% abolition formula

CORE FORMULAS

Formula / Rule	QA Reminder
Mandatory Retirement gratuity = $(\text{service} \times \text{annual salary} / 500) \times (1/3) \times 15$	Early Retirement and Discharge (A.O.R): same qualification route and same outputs for the same service, age profile, salary, and dates
Mandatory Retirement monthly pension = $((\text{service} \times \text{annual salary} / 500) \times (2/3)) / 12$	Discharge (C.B.E), Discharge (U.B.E), and Discharge (Public Interest) below 10 years: gratuity only
Mandatory Retirement full pension = $(\text{service} \times \text{annual salary} / 500) / 12$	Discharge (Marriage): gratuity only
Short-service gratuity = $(\text{service} \times \text{annual salary} \times 10) / 500$	End of Contract and Discharge (T.X): same output
Discharge (Marriage) gratuity = $(\text{service} \times \text{annual salary} \times 5) / 500$	Voluntary and Old Age: same output as Mandatory Retirement
End of Contract gratuity = $0.25 \times \text{annual salary} \times 2$	Abolition of Office: must not use the normal Mandatory Retirement pension values
Abolition gratuity = $((\text{service} \times \text{annual salary} / 500) \times 0.25 \times (1/3) \times 15)$	
Abolition monthly pension = $((\text{service} \times \text{annual salary} / 500) \times 0.25 \times (2/3)) / 12$	
Abolition full pension = $((\text{service} \times \text{annual salary} / 500) \times 0.25) / 12$	

LEGACY ALIASES STILL ACCEPTED

Contract Expired -> End of Contract (contract) | Retirement by Death -> Death (death) | At Own Request -> Discharge (A.O.R) (aor) | Medical Grounds -> Discharge (Medical) (medical) | Public Interest -> Discharge (Public Interest) (public) | Discharge -> Discharge (C.B.E) (cbe)
